

Automatic Weighing and Packing Machine YNDT

The automatic weighing and packing machine is suitable for tea, powder, granule, parts etc automatically packing.

Automatic weighing and packing machine is separating and packaging one combination, the machine quality is stable and reliable; The machine adopts double vibration cutting material packaging, above the weighing machine with vibration cutting, the other weighing bucket also install a vibration motor, the items in the discharge can follow the vibration, the following packaging Sealing machine also has a vibration with the installation, the material will also be when the vibration, the powder particles can be better products under the packaging, not easy to card material, so that packaging more smoothly.

Filling Sealing Machine for filter cotton paper, composite film, aluminum foil bags, non-woven fabrics, oil paper, heat sealing plastic bags and other heat-sealing packaging materials.

Technical Parameters:

Machine model	YNDT
	automatic weighing and packing machine
Material	stainless steel
Filling range	2-50g,30-500g,30-1000g
Function	weighing,filling,sealing and cutting
Working speed	about 10-25 times/min
Sealing type	3 sides seal
Formed pouch width	Min 6cm ; Max 8 cm (finished bag width is fixed)
Available coiled material	plastic film,filter paper,aluminum foil,laminated film,non-woven fabrics etc
Voltage	AC 220V/110V 50-60Hz
Power	350W
Dimension	500*420*1450mm
Weight	60kg
