

Three-side Sealing Sauce Packaging Machine

The Three-side sealing sauce packaging machine is suitable for the small bag packaging of non-flowing paste materials and liquid materials with good fluidity. The filling of sauces and various particles containing materials, such as pulp-containing beverages, honey, tomato sauce, chili sauce and all kinds of pastes.

The shape of the packaged product is a three-sided or four-sided back seal. (Note: The three-sided sealing shape is a conventional product, and the four-sided sealing shape requires a special customized heat sealer body.)

Features:

1. The small-bag chili oil packaging machine adopts liquid pumping, independent mixing system, servo coding, and microcomputer control.
2. Adopt double servo control system, self-stop, self-alarm, self-diagnosis, safe and easy to use.
3. It has the functions of automatic feeding, counting, heating, packaging, adjustable packaging speed, fault display, etc.
4. Unique packaging sealing technology makes the sealing beautiful and firm.
5. The filling, weighing, bag making, sealing, date printing are completed in one go.
6. Adopting an external film release mechanism, the packaging film installation is simpler and easier.
7. The deviation adjustment of the packaging bag only needs to be adjusted on the touch screen, and the operation is simple.

Technical Parameter:

- Packing speed: 130-70 bags/min
- Bag length: 40-160mm
- Machine weight: 480KG
- Package weight: 1-120 grams (customizable)
- Packing error: ± 0.2 g (depending on different materials)
- Equipment size: 820*980*1680mm
- Voltage/power: 220V/1800w
- Packing range: nuts, peach gum, wolfberry, tea, seeds, grains and other granular products.
