

Automatic PET Bottle Blow Molding Machine BL-2

Features of main body:

- 1). This machine is characterized by Low cost, high efficiency and its easy operation and maintenance as well as its stable performance with advanced PLC.
- 2). Preform self-rotation and infrared preheater revolution assure the even distribution of heat, which improve the bottle shaping rate, increase the production.
- 3). High adjusting performance to enable preheat the preforms perfectly by adjust the voltage control area in the PLC, which could adjust the temperature of the infrared lights in the preheater, and keep the proper temperature and humidity invariable.
- 4). High safeties with security automatic-locking device in each mechanical action, which will make the production into a perfect safe environment, in case of the breakdown in certain procedure.
- 5). Introduce the FESTO air cylinder to avoid contamination and noise.
- 6). Satisfaction with different atmospheric pressure for blowing and mechanical action by dividing the blowing and action into three parts in the air pressure diagram of the machine.
- 7). Strong clamping force with high pressure and double crank links to lock the mould.
- 8). Safe, reliable and unique design of the position of valve to make the pneumatic diagram in the machine easier to understand.
- 9). Ideal cooling system makes the finished bottles without any flaws.
- 10). Low rejection rate: less than 0.2 percent

Technical Parameters:

Plastic Processed:	PET, PP, PC, Tritan
Material:	SUS 304/316
Dimension(L*W*H):	1630*620*1590mm
Machine Material:	304 Stainless Steel
Core Components:	PLC
Certification:	CE, ISO 9001:2008
Key Selling Points:	Competitive Price
Capacity:	800-1000pcs/min
Application:	Bottle
Automatic Grade:	Semi Automatic
Voltage:	220V / 380V / 415V
Weight:	1000KG
Product Name:	PET Bottle Blowing Machine
Condition:	New
Bottle Volume:	50ml-2L
Blow Moulding Type:	Stretch Blow Moulding
Power:	15kw
