

## *YG-8 Automatic Capping Machine*

The YG-8 automatic capping machine (pressure plugging machine) is specially designed for the pressure lock sealing of the cylindrical bottles with plastic inner cover and the outer cover. It has strong adaptability to recycled bottles, stable and reliable performance and simple operation. The machine has reasonable design, high degree of automation, automatic cover and cover, and automatic removal and anti-cover device.

### **Features:**

1. This device is specially designed for the compression seal of the cylindrical inner plastic cover and the outer cover.
2. Stable and reliable performance and easy operation.
3. Production capacity: max. 6000 bottles / hour
4. Pumping rate: 15 L/S

### **Technical Parameters:**

- Number of gland heads: 8
- Applicable container diameter:  $\phi 40\text{mm}-\phi 100\text{mm}$
- Applicable container height: 80mm~280mm
- Production capacity:  $\leq 6000$  bottles / hour
- Applicable cap diameter:  $\phi 17\text{mm}-\phi 35\text{mm}$
- Applicable inner diameter:  $\phi 12\text{mm}-\phi 35\text{mm}$
- Applicable cap height: 10mm-30mm
- Power supply: AC220V; 50Hz
- Machine power: 3kw
- YG-8 automatic capping machine dimensions (length  $\times$  width  $\times$  height): 2000mm  $\times$  1100mm  $\times$  2200mm
- Need to prepare vacuum:  $6.67 \times 0.01\text{Pa}$
