

## GZJ50 Tube Filling Machine

GZJ50 Tube Filling Machine is widely used in toothpaste, cosmetics, pharmaceutical cream category, food, shoe polish and viscose and other industries. It is applicable to aluminum-plastic, plastic hose packaging products filling, sealing and printing lot number. It can fill liquid material and cream material through special design and special filling device. It can be used independently, but also with automatic packaging machines and other equipment production lines.

### Specifications:

Type	GZJ50
Capacity(pcs/min)	50
Power(kW)	1.5
Tube Diameter(mm)	13-40
Tube Length(mm)	80-200
Dosing Volume(ml)	1.5-200
Compressed air(MPa)	0.6
Weight(kg)	600
Dimension(mm)	1500x1000x1600
