

CZJ-4 automatic twist cap machine

Purpose and brief

This machine is suitable for diameter 10mm-100mm all kinds of caps, to overcome the traditional one kind of bottle capping machine with one kind of capping heads shortcomings. Kinds of new and unique aircraft design, operation and regulation is very convenient, the production speed. Both for stand-alone product, it is ideal to connect the production models.

Even if the long-term fatigue of the machine work, is still stable and reliable, consistent torque; bottle belt clip can be individually adjusted for different heights and shapes of bottles of rubbing cover; configuration torque limiter, which can effectively ensure the consistency of torque products.

Main technique parameters

Production speed: 60 ~ 150 bottles / min

Suitable cover: ϕ 10mm ~ ϕ 100mm

Bottle height range: 60mm ~ 350mm

Power Source: 380v 50Hz three-phase four-wire

Power: 1.5KW
