## *Induction Sealer YMFA*

The Induction Sealer/Aluminum Foil Sealing machine is widely used for bottle aluminum sealing in an effort to play an important role in the prevention of corrosion and thievery.

### **Key Features:**

- Applicable for different-size round, rectangular and irregular bottles and containers without spare parts change over.
- Tunnel design sealing head. It is especially suitable for closures requiring a foil liner deep inside its chamber, e.g. sports caps and child resistant closures. Height of sealing head adjustable.
- Sealing power can be adjusted according to the process (packing speed, type of cover etc.)
- The foil sensor removes improperly capped bottles or foil misses.

## Technical Parameters:

- Bottle neck diameter: 15mm-75mm(customizable)
- Capacity: 0-400bots/mim
- Linear velocity: 0-35m/min
- Power supply: 220V 50/60Hz
- Power: 2-4kw
- Net weight: 200Kg
- Dimension: 2000×900×1200mm
