

MG-5050 Flat-shaped Automatic Sealing Machine

The carton sealing machine adopts instant adhesive tape to seal the carton, which is economical, fast and easy to adjust. It can complete the upper and lower sealing actions at one time. It can also use printing tape to improve the product image. It is the first choice for automatic packaging of enterprises.

Feature

1. The machine structure uses screw and chain to adjust the two widths simultaneously.
2. Imported box sealing machine accessories new patented tape applicator, no blower is used to blow up the tape, and the patented tablet pressing device makes the tape stand upright and will not bend and cannot be pasted. It is convenient to seal and pack.
3. The width of the belt is designed for better grip. The buckle type connection design will not cause degumming and fracture. The sealing machine is very easy to use and replace the belt, which is convenient and fast.
4. The sealing tape manufacturer independently innovates the large-scale transmission wheel design, increases the bending arc, increases the belt contact area, the belt will not slip, and the service life is increased, and the sealing machine technology is very mature. The main drive mechanism of the professional sealing machine uses a special bearing for high precision and low noise, which increases the service life of the belt.
5. The folding angle of the tape at both ends of the carton can be adjusted.
6. The sealing machine factory designs a series of no-tape alarms, and the automatic shutdown device when the door is opened to ensure the safety of maintenance.

Technical Parameters

- Product name/specification - MG-5050 flat-shaped automatic sealing machine
- Maximum packaging size - L~~~W500×H500mm
- Minimum package size - L150×W150×H120mm
- Table height - 470~780mm
- Conveying speed - 0-20m/min
- Tape width - 48mm/60mm/72mm
- Use power - 220V 50HZ
- Machine size - 850×830×(1200-1600)mm
- Machine weight - 120kg
