

## *Vertical type Automatic Carton Erector CHS-6701*

Our CHS-6701 is a vertical type Automatic Carton Erector. This Automatic Carton Erector Machine – Box Erector Machine is useful in bulk productivity in short duration, erecting cases of various sizes into different shapes and seal the bottom of the box with tape/hot glue. Carton erecting machine is very much useful and in high demand for auto packaging line.

### **Features**

- The Automatic Carton Erector adopts touch-screen panel. It is easy to operate the machine.
- Automatic Carton Erector can fit for automatic packaging system, opening, forming, folding and sealing action accomplish at a time.
- Vertical type storage can supply the un-opened carton anytime.
- Carton erector is easy to adjust for different size of carton.
- PLC controlled– easy to alter the program.
- Japanese pneumatic element.
- Humanizing designed, easy to operate.
- Assembly with safety signal device on the machine and the deficiency alarm at the carton storage.

## Specification

| <b>MODEL</b>              | <b>CHS-6701</b>                                      |
|---------------------------|--|
| Function                  | SIDE DRIVE   |
| Power                     | 1 $\phi$ , 110V/220V/240V , 50/60HZ                  |
| Power supply              | 800W   |
| Carton size               | L =250~500MM, W =170~400MM, H =90~550MM              |
| Cardboard Temporary stock | 50/60 PCS  |
| Capability                | 8-12 CTN/MIN (depends on carton's size and material) |
| Working table height      | 650MM  |
| Air compressor            | 6 KG/cm <sup>2</sup>                                 |
| Tape width                | 2" or 3" (according to customer's need)              |
| Machine size              | L =2210 x W =1650 x H =1700MM                        |
