

Semi-Auto Rotary Type Mascara / Lip-gloss Filling Machine CM-M-L/02

This machine is a kind of semi-auto filling machine for mascara and lip-gloss. The process section is including auto filling, automatic wipers inserting, brush inserting and capping device.

Features

- With auto wipers input, wipers checking, and capping function. Also it has option on program to set functions.
- Material tank is 15 L, with heating, mixing, and pressuring functions.
- This machine adopts piston filling system, filling parameter is able to set on touch screen.
- This machine is made from servo motor driven, materials sucking, lifting and capping system.
- Wipers are fed through vibration table.
- With weigh checking device to remove over weight products and not enough product.

Process

- Manually feeding container;
- Auto filling with two nozzles;
- Auto wipers inserting;
- Manual brush cap feeding;
- Auto capping;
- Auto push finished product to conveyor;
- Auto transfer to weigh checker;
- Auto weigh checking.

Technical Parameters:

Outer dimension	1200*800*2080mm
Power consumption	7kw
Voltage	AC220V,1Ψ,50/60Hz
Air supply	0.6-0.8mpa,≥800L/min
Output	28-36pcs/min
Cleaning time	30min
Weight	700kgs
Application	Mascara,Lipgloss
