

## *GCF-40 Automatic Rotary Type Cream Filling and Capping Machine*

This machine is designed for cream products in jar, it includes auto feeding, auto inner seal, auto outer cap feeding, and auto capping system.

### **Features**

- ◆ Adopting servo motor to drive the piston type filling system to make precision higher.
- ◆ PLC control, human touch screen to set related parameters, to effect easy operation.
- ◆ Just replace different bases can effect different sizes of jar to full in one machine.

### **Technical Parameters**

Outer Dimension	2230 x 1450 x 2020mm
Voltage	AC220V,1P, 50/60HZ
Power	2.5KW
Air Pressure	0.6-0.8Mpa, ≥300L/min
Capacity	30-40 pcs/min
