

SPX-007 Ultrasonic Tube Sealing Machine

SPX-007 Ultrasonic sealing machine is advanced equipment for plastic tube sealing and aluminum plastic tube sealing. It uses ultrasonic seals the plastic tube heat shock effect produced by the transducer and to rapidly melt adhesive.

No need to add any supplements, even if the surface contamination, but also will not affect the sealing result.

SPX-007 with automatic tube orientation (mark sensor), automatic sealing, auto date printing and trimming.

Technical Parameters:

Model	SPX-007
Frequency	20KHz
Power	1.5 Kw
Power supply	AC220V
Capacity	8-15tubes/min
Sealing diameter	5-50mm
Max. Height	250mm
Net. Weight	98kgs
Dimension	L850*W600*H640mm
