

WP-880K-6 Silica Gel Desiccant Packing Machine

The equipment has a high degree of packaging flexibility and can adapt to the needs of different packaging materials and packaging sizes. It can easily realize various packaging methods such as special-shaped packaging, diversified packaging, and subdivided packaging, providing products with more diversified packaging forms.

Products introduction

First and foremost, the silica gel desiccant packing machine boasts a modular design that's a dream come true for maintenance and replacements. It's incredibly user-friendly, with a humanized operation interface and helpful prompts, making the process straightforward and drastically reducing the likelihood of breakdowns. This ensures minimal downtime and maximum efficiency.

Secondly, the packaging performance of this machine is nothing short of exceptional. It guarantees that the packaging results meet and exceed market expectations, safeguarding product quality and preserving its original flavor. Furthermore, the equipment strictly adheres to the stringent hygienic standards set for food, pharmaceutical, and cosmetic packaging, thereby enhancing product safety and trustworthiness.

Thirdly, the versatility of this silica gel desiccant packing machine is truly remarkable. It caters to a diverse range of industries, offering tailored packaging solutions that elevate the product experience for consumers. Additionally, its energy-saving and eco-friendly features align perfectly with modern society's environmental consciousness, fostering sustainable business practices and contributing to a greener future.

Lastly, investing in a silica gel desiccant packing machine significantly bolsters a company's image. Such advanced packaging technology showcases the company's commitment to

technological advancement and innovation, reinforcing its brand identity. It also elevates the brand's perception in the minds of consumers, fostering a stronger sense of recognition and favorability, ultimately driving business growth and success.

Products Parameters

Model	WP-880K-6
Capacity	35-50 cycles/min
Filling Range	0.5-5g
Size	长(L)50-160宽(W)25-100
Power	3200W
Voltage	220V/380V 50-60Hz
Packing Material	Nonwoven Fabric,PE/PET,NYLON/PE etc.
Weight	850kg
Dimension	1730*750*2550(mm)(L*W*H)
