

SD-QRGF-160 Automatic Paste Filler and Capper

The SD-QRGF-160 automatic paste filler and capper is a kind of completely automatic filling capper packing machine. This filling sealing machine adopts the most advanced pneumatic and electron machinery motion principle in China. The equipment is full automatically that can finish the whole processes of auto-dropping, pipes filling, no filling without pipes, electron scanning, and sealing together.

Application:

This automatic paste filler and capper(filling capper) is widely used for the packing of soft pipes of various products, such as ointment, liquids, pastes, creams, honey cosmetic and latex, to name a few.

Feature:

1. The machine can be changed along with different dropping pipes, revolving plate and mould according to the specs of soft pipes.
2. the driven between each electrons and pneumatic machinery is stable and safe, simple to operate and adjust .
3. It is suitable for compound pipe, plastic pipe and aluminum pipe.

Product Specialty

- Filling amount: 5-60g 60-250g
- Precision: $\leq \pm 1\%$
- Power and voltage: 220v 750w
- Pneumatic pressure: $\leq 6\text{kg/cm}^2$
- Producing ability: 80-120 pipe/minute
