

CGN-208D1 Powder Granule Pellet Semi Automatic Pharmaceutical Capsule Filling Machine

The improved capsule filling machine CGN208-D1 is simpler to operate with less maintenance and better filling quality. The new capsule seeding, filling and locking system increases productivity and lengthen the machine uptime. It is designed for mid-volume customers to provide up to 18 months of uptime without preventative maintenance.

Product Parameters

Item	Semi Automatic Capsule Filling Machine		Automatic
Machine model	DTJ-C/V/VV series	CGN208 series	NJP series
Max. Output	12000-20000 Capsules/hour	15000-25000pcs/hour	24000-450000pcs/hour
Capsule Size	000#/00#/0#/1#/2#/3#/4# /safety capsule		000#-5# all size
Dosage Type	powder/granule/pellet/liquid		
Power Supply	220/380V±10%,50/60Hz,3ph		
Weight	Net:400KG Gross:500KG	Net:480KG Gross:580KG	Determined according to the different model
