

SH-AFS04 Automatic Bagged Coffee Bean Sugar Seasoning Fertilizer Granule Pre-made Pouch Bagging Packaging Machine

A premade pouch granule packaging machine is a type of packaging machinery that is designed to automatically fill and seal premade pouches with granular products. The machine typically consists of several components, including a product hopper, a dosing system, a pouch feeding system, a filling system, a sealing system, and a control system. It is widely used in food, daily chemical, fertilizer industries.

Main Feature

- ▶ Set filling weight directly to realize quantitative filling.
- ▶ Can feed pouch, fill granules and seal pouch automatically, saving labor cost.
- ▶ The machine can be customized as your need.

Parameter

- Machine Model: SH-AFS04
- Power Supply: 220V/110V 50-60Hz 920W
- Working Speed: About 22-30bags/min (depending on bag size and filling materials)
- Weighing Range: 0.1-99.9g
- Weighing Accuracy: ± 0.1 g
- Pouch Size: 50-180mm(Width)*70-260mm(Length)
- Hopper Capacity: 30kg
- Air Pressure: 0.6-0.8MPa, 0.83m³/min
- Package Size: About 1090*750*2040mm(Packing Machine)
- About 940*500*1270mm(Dust Collector)
- Package Weight: About 233+72kg
