

TD-7 Pneumatic Rotary Type Cup Filling and Sealing Machine

Suitable for automatically filling and sealing plastic cup and box as a container. Used for packing drink, yogurt, jelly, pudding, soya-milk, mineral water etc.

Automatically dropping cup, filling, light sensor, printing date, sealing, cutting etc. The machine is made of steel and 304 stainless steel with well-known pneumatic components. It has simple construction and easy to operate.

We can make the machines according to customers' different requirements.

Technical Parameters

Model	TD7-1
Packaging speed	1600-1800pcs/h
Filling content	0-250ml (adjustable)
Voltage	3-phase 4-line
	Socket (380V 50HZ customized)
Electric motor power	0.76KW
Heat up power	500W
Air pressure	0.5MPa-0.75MPa
Maximum air consumption	0.45m ³ /m
Size(L*W*H)	1100*1100*1400mm
Weight	About 800kg
