

CGF 24-24-8 Water Filling Machine

The machine is mainly used for washing, filling sealing Non-Areated carbon dioxide drink such as mineral water, pure water, non-gas wine drink and so on. The machine design is shorten the time for the drink material contact with outside, increase the sanitation condition throughout economy benefit.

Our mineral water plant is designed using cutting-edge technology to ensure water purification is of the highest standards. With a focus on sustainability and efficiency, the plant is ideal for small and medium-sized businesses looking to enter the bottled water market. Designed to produce mineral-rich water that is not only refreshing but also beneficial to health, the plant is ideal for health-conscious consumers.

Cost-effective production

One of the outstanding features of our mineral water plant is cost-effectiveness. The initial investment to set up the plant is affordable and both entrepreneurs and small business owners can afford it. Operating costs are kept to a minimum through energy-efficient processes and advanced filtration systems, ensuring that you can produce high-quality bottled water without spending too much money. This means that you can focus on growing your business while providing your customers with the best hydration options.

Compact and efficient design

Our mineral water plants are compact and suitable for a variety of locations, whether you are starting with a small plant or looking to expand an existing business. They are designed to be easy to use, easy to install and operate. With a streamlined production process, you can efficiently produce small-bottle mineral water to meet consumers' growing preference for convenient, on-the-go hydration solutions.

Quality Assurance

Quality is at the heart of our mineral water plants. Each unit is equipped with advanced filtration and purification technologies, including reverse osmosis, UV sterilization, and mineralization processes. This ensures that every drop of water produced meets the highest safety and quality standards. Our plants also allow for customization, enabling you to adjust the mineral content based on market preferences, giving you a competitive edge in the bottled water industry.

Sustainability Commitment

In today’s environmentally conscious market, sustainability is key. Our mineral water factories are designed with environmental responsibility in mind. The production process minimizes waste and energy consumption, and we encourage the use of recyclable materials for packaging. By choosing our factory, you are not only investing in a profitable business activity, but also contributing to a healthier planet.

Technical Data

Model	CGF	CGF	CGF	CGF
	18-18-6	24-24-8	32-32-10	40-40-12
Capacity(500ML)	8000BPH	12000BPH	15000BPH	18000BPH
Washing Heads	18	24	32	40
Filling Heads	18	24	32	40
Capping Heads	6	8	10	12
Suitable Bottle	PET Bottle, Plastic Bottle			
Diameter of bottle	Diameter: 55-110 MM			
Height Of Bottle	150-310MM			
Suitable Cap	Plastic Screw Cap			
Weight	4000kg	4500kg	6000kg	7800kg
Main Motor Power	3kw	3kw	3kw	5.5kw
