

# SILC - C200

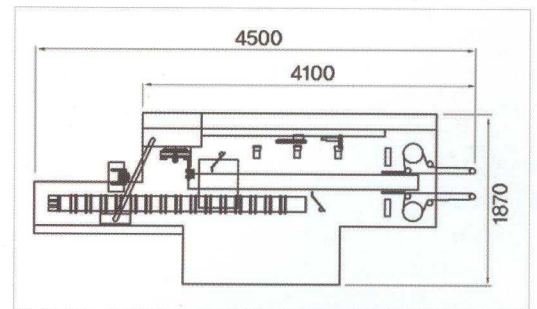

## Horizontal Cartoning Machine

Intermittent or Continuous Motion  
Horizontal Cartoning Machine

### Features

- Servo driven control for intermittent and continuous motion
- Rotation and revolution movement with 3 head vacuum pads for carton pick-up and forming system
- Carton rotating pick-up movement mechanism is not required level adjustment for size change, only needs to adjust of receiving-settle pad which is so easy and fast.
- Multi-steps product pushing-in system for high speed inserting
- Easy and fast carton size change over, within 15-20 minutes for 3 dimension change by digital indicator and simple adjustment mechanism with no size part(normally) or minimum parts
- approx. 2.5 meters long flat carton stacking magazine with slip pushing belt (option)

Carton size range (mm)	A / 20-100 (standard)
min. - max.	Special A1 / 100-250
	B / 16-60 (standard)
	Special B1 / 80-150
	C / 85-150 (standard)
	Special C1 / 150-300
Operation speed (max. cycles/min.)	Mechanical : 250 Running : 200
Electric power	380V, 50/60Hz, 3Ph.
Compressed air	6 bar
