

## Stick Pack Machine for Free Flowing Products TP-G001

This machine is designed to fill free-flow products such as sugar, salt, spices and black pepper through volumetric cups in packaging papers that are affixed on three sides. (3 side seal) The volume of volumetric containers can be adjusted, so the desired weight sensitivity is provided. All settings of the machine can be made on PLC and touch screen. Our machines with 5-10 channels can produce 500 pcs/min. You have the option of ordering 100% stainless steel stick pack machine. TURPACK the manufacturer guarantees each machine's electronic, mechanical and pneumatic systems for 2 years.

The machine can automatically fill all kinds of special free flowing granules including white sugar, brown sugar, sweetener, cinnamon, salt, pepper, all spices, aromatic fruit drinks, granular coffee, free flowing powder and Silica Gel Pouches under sterile conditions.
