

MIC-L60 Automatic Aluminum Tube Filling Sealing Machine

An aluminum tube filling and sealing machine is mainly used for aluminum tube filling and sealing.

It has been widely used in the fields of pharmacy, cosmetic, food and chemical etc.

This machine function is:

1. Consists of tube feeding system, orientation system, filling system, internal-heating system, outside heating system, Sealing and batching system, end cutting system, ejection system.
2. Adopt PLC, photo sensor, rotary plate controlling system.
3. Adopts slot wheel dividing system to drive the turntable to do intermittent movement
4. Filling measurement is accurate. Heating time is stable and adjustable. Sealed tail looks pretty and neat and the trimming is very tidy.
5. This machine has stable performance and work without any noise and pollution.
6. The part which is contact with the filling material is made of high-quality stainless steels. The parts which need to clean are made of quick-change device that is removable and convenient for washing.

PARAMETER

Weight	1200 Kg
Dimension	1900*1400*2000mm
Power	220V/50Hz
Motor	2.2 Kw
Filling Quantity	3-20ml, 15-75ml, 75-250ml
Capacity	50-60 tpm
