

JAT-F400 Sprial Vibration Feeding Machine

- *Hopper wall 1.5mm frame material 304 stainless steel.
- *Select tube diameter 102 sanitary tube, and add polishing process inside the tube.
- *The upper material screw is full of welding and polishing, the blade thickness reaches 2mm, the upper material speed is quick, and there is no dust
- *Vibration device, prevent powder accumulation, ensure smooth. Vibration feeder preferred listed brand Zhejiang "wolong".
- *RV gearbox transmission, efficient operation, long service life and high carrying capacity.
- *The tube cover of the "U" type pipe can be opened at will, and the screw block is removed and installed to facilitate the cleaning and installation of the equipment.

技术参数 Technical parameters

型号 Model	JAT-F400
提升量 To enhance the volume	5M ³ /小时
料仓容积 Hopper volume	400L
上料管径 Feeding diameter	φ141
提升高度 Lifting height(standard)	2.4M
电源、功率 Power	三相380V 50HZ 2.2KW
整机重量 The whole weight	130KG
粉仓体积 Bunker volume	L1160×W890×H1000mm
提升角度 Enhance the angle	450 (300-600)
