

Capsule Polishing Machine YPJ-III

This machine is a kind of special equipment for pharmacy. It is driven by variable speed control, polish and clean powder on pills or tablets to get smooth products and meet hygeian standard of pharma industry. It is suitable for various kinds of pills and tablets.

The performance of the whole machine is good. The machine is made of stainless steel, and the mesh cartridge and the brush are connected by compression fitting, easy to assemble and disassemble, and can be cleaned thoroughly. Also, the motor speed is controlled by the inverter and can withstand large starting torque, which makes the machine run smoothly and reliably. In addition, equipped with flexible rollers, it is convenient for the machine to move. Hence, the machine is easy to operate, reliable, high in production efficiency and the polishing cleanliness.

Remarks

This machine includes pedestal, machine frame, canister, brush and electrical system. Adopts special DC motor, import polishing brush and spiral feeding in-and-out accessory. This machine is light weight, novelty structure, good appearance, simple operation and high efficiency.

Before electrifying, turn around the main shaft manually to ensure the shaft is under good condition.

Before polishing different kinds of capsules, please clean the brush, net, and hopper completely. Clean the filter bag of the dust-collector.

Specifications

Model	YPJ-III
Capsule Model No.	00# 0# 1# 2# 3# 4#
Output Capacity	10000 pcs/min
Power Supply	220V 50Hz/110V 60Hz
Compressed Air	2.7m ³ -0.014Mpa
Dimension	1025*550*900 (mm)
Weight	40kg
Gross power	0.18kg
