

Capsule Filling Machine Automatic Operated CGN-208

CGN-208 is a new equipment for filling powder, granule or pellet into hard hollow capsule. It can be used for filling 000#, 00#, 0#, 1#, 2#, 3#, 4# and 5# standard capsules. The structure is novel, the structure of the capsule locking is improved, saves labor, improves work efficiency, has beautiful appearance and meets the requirements of GMP production. It is the preferred product for many pharmaceutical manufacturers, health care products manufacturers, hospitals, mass production or laboratories.

Technical Parameter:

Usage:	Medical, Capsule Filling, Medicine Capsule
Voltage:	220V/380V
Driven Type:	Electric
Power:	2.12kw
Capacity:	28000 capsuies/hour
Dimension(l*w*h):	1300*800*1750mm
Weight:	400Kg
