

Semi-Automatic Square Bottles Label Applicator JT-60

The semi-automatic square bottles label applicator machine has a reasonable structure, reliable performance and simple operation with optical detection and accurate labeling. The semi-automatic square bottles label applicator machine is used to label the flat PET bottle, plastic bottle, glass bottle and metal bottle and it is with high quality, good performance, long service life.

Product Details:

1. The semi-automatic square bottles label applicator machine is widely used in food, cosmetic, pharmaceutical, daily chemical care industries etc and it is used to label the flat PET bottle, plastic bottle, glass bottle and metal bottle.
2. One of the functions of the semi-automatic square bottles label applicator machine is label light sensitivity is adjustable. For label backing paper of different transmittances, it could compare and adjust the sensitivity and compare and make the best adjustment to the label of different lengths to ensure the normal feeding and smooth and accurate labeling.
3. Small structure takes up less space and easy to move and load.
4. Good labeling precision and stability; Neat, no wrinkle, no bubble of the semi-automatic square bottles label applicator machine.
5. Whole semi-automatic square bottles label applicator machine is mainly made of stainless steel and high level aluminum alloy and the whole structure is strong and harmonious.

Technical parameter:

| Model | JT-60 |
|-----------------------------|--------------------|
| Voltage | 220v 50Hz110V 60Hz |
| Power | 120 |
| Label Speed | 25-50 pcs/min |
| Lavel Roll Inner Diameter | ≥75mm |
| Wide Of Label | 10mm*120mm |
| Label Accuracy | ±1mm |
| Max Label Roll Out Diameter | ≤250mm |
| Net weight | 34KG |
