HYXG-200F Automatic Star Wheel Single Head Fetching Type Capping Machine

Automatic Star Wheel Single Head Fetching Type Capping Machine adopts the design of vibrating cap sorter, elevator cap sorter and fetching cap supplier. The capping head takes the cap and then capping which guarantee the qualification rate of capping. It can realize the capping of plastic caps, aluminum caps and press-in type caps in changing different capping device. It is easy to replace and operate. Capping for different containers can be replaced in a short period of time. The capping machine can be used as a single machine or used in the filling line.

Automatic Star Wheel Single Head Fetching Type Capper applies to the capping for chemicals, medicine, food, cosmetics and cleaning products.

Main Technical Data

Maximum capacity: ≤ 2000 B/H
Applicable cap diameter: $\phi 15$ - $\phi 50$ mm
Suitable bottle diameter: $\phi 30$ - $\phi 90$ mm
Suitable for bottle height: 80-250mm
Total Power: 2 Kw
Power supply: 220V/380V 50Hz
Air supply: 0.5-0.7Mpa
Dimension: 2400x1500x2000mm
Weight: 400 kg
