CGN208D Semi Automatic Capsule Filling Machine

Integrating machine, electricity and air, it adopts micro-computer PLC control with touch screen panel operation, it adjusts the speed by frequency conversion, equipped with electric auto counting device to complete the placing, separating, filling and locking for capsule respectively So it can decrease the working intensity and increase the working efficiency, this kind of machines meet the requirement of pharmaceutical sanitary, it is suitable for filling powder and granular material in pharmacy and health food industry into capsule

Features:

With electric auto counting device to decrease the working intensity and increase working efficiency.

Automatically complete placing, separating, filling and locking for capsule respectively.

Exactly filling, novel structure, beautiful appearance and easy operation.

According with requirement of pharmaceutical sanitary.

Technical Parameter:

- Production capacity: 10000-20000pcs/H
- Capsule size: No. 00#-5#
- And safe type capsule: A-E
- Power supply: 380V 50Hz 2.2KW Noise <60dB(A)
- Overall dimension (mm): 1200 x 700 x 1600 Net weight (kg) 330
