

## LP-200B Round Bottle Unscrambler Machine

Automatic Bottle Unscrambler is making up with the bottle elevator, unscrambling rotary plate, bottle rejecting devices, unscrambling and electrical control cabinet. It can arrange the disordered empty plastic bottles into good order. The machine is with the features of compact structure, simple operation, mature technology and stable running and operation.

### Features:

1. The machine is easy to operate; only three buttons can operate the machine. It can handle the bottles from 50-1000ml.
2. Quick change-over between different sizes of bottles without any tooling. Only changing the belts and unscrambling parts space can realize change-over between bottles.
3. Machine covers with organic glass.
4. It has bottle elevator that can store the bottles for several hours usage.
5. Coordination sensor, if there is any bottle stuck, it will stop automatically.

### Technical Parameters:

Model	LP-200B
Capacity	6000 BPH
Air Pressure	0.5-0.7MPA
Power	2000W 220V, 50HZ
Material	SS304
Dimension	2550*1450*1450mm
Weight	670Kg
