

Industrial Ribbon Mixer TH-MM-100

Industrial Ribbon mixer adopts U-shaped cylinder, with a unique structure of inner and outer ribbon, Outer spiral conveys the material move from the two sides to the center and the inner screw conveys the material move from the center to the sides to get a high effective convective mixing.

Industrial Ribbon mixer Widely used in chemical industry, medicine, compound fertilizer, dyes, pigments, rubber, building materials, food, milk powder, health products, feed, additives, aquaculture, biological engineering, fine chemical industry, ceramics, refractory materials, rare earth, plastic glass, new materials, nuclear materials and other industries.

Additional configuration

1. Driven unit: Many worldwide famous brands are for option: SEW, ABB, Siemens and so on
2. Bearings: NSK/SKF and so on
3. Heating/cooling jacket
4. Spraying system
5. Heavy duty type (loading your material into the mixer first and then start the mixer)
6. Platform: we build the platform for you or we design it and you build it locally
7. Mixing system: including packing machine, bucket elevator, Sieve, screw conveyor and so.

Customizing according to client's specific requirement

Machine parameter:

Machine model	TH-MM-100
Machine material	SUS304
Power supply	3Kw, AC380V, 50/60HZ
Working capacity	280 liters
Machine size	1.85m*0.65m*1.55m
Machine weight	250kgs
