

## *NJP-3800 Automatic Hard Capsule Filling Machine*

This machine can meet the needs of mass production of the majority of pharmaceutical factories, and its function has reached the domestic advanced level.

The output of this machine is very high, reaching 210,000 grains per hour. Controlled by PLC and frequency converter, the speed is adjustable, and it is more convenient to use and maintain. Fully comply with GMP certification requirements.

### **Features:**

1. This machine is an intermittent action, fully automatic hard capsule filling equipment with orifice filling, which is completely closed at the filling and rotating parts, which is easy to clean.
2. One-way movement of upper and lower modules, imported double-lip polyurethane sealing ring, good sealing performance.
3. Combining the blowing and suction phases of the module cleaning station to ensure that the die holes at high speeds are free of dust.
4. A powder suction device is installed in the locking station.
5. The bag-out station of the finished product is equipped with a bladder ring, so that there is no dust flying.

**Technical Data:**

<b>Model</b>	<b>NJP-3800</b>
Capacity	3800Capsules/minute.
Filling type	Powder, Pallet, Tablet
Number of die holes	27
Power Supply	380/220V 50Hz
Suitable Capsule Size	capsule size00"-5" and safety capsule A-E
Filling error	±3%-±4%
Noise	≤75dB(A)
Making rate	Empty capsule99.9% Fully capsule over99.5
Machine Dimensions	1850*1470*2080mm
Machine Weight	2400kg
