

Food Grade Pet Feed Ribbon Blender Machine WLDH-0.1

The horizontal ribbon Mixer Machine is made of stainless steel 304 or stainless steel 316 as required. The Mixing Machine is composed of U-shaped container, spiral band mixing blade and transmission parts. The outer spiral belt coiling form in the mixing container matches the rotation direction to push the materials from both ends to the middle, while the inner spiral belt pushes the materials from the middle to both ends, forming convection mixing, so that the materials can be mixed.

Technical Parameters:

- Model No.: WLDH-0.1
- Application: Medicine Processing, Chemicals Processing, Food Processing, Powder
- Max. Loading Volume (L): 80
- Power (kW): 3
- Weight (KG): 330
- Dimension(L*W*H)(mm): 1190*740*770
