

Legend 1500 / Automatic Capsule-Filling Machine

Legend 1500 is the next generation in automatic capsule fillers. With speeds up to 90,000 capsules per hour it is ideal for medium sized batches. It combines futuristic design with ultra-modern engineering to bring to the fore key requirements of the pharmaceutical industry and its regulators. Validation is a breeze with the Legend 1500's cGMP compliant ergonomic design and 21 CFR part 11 complaint batch records. Productivity is enhanced with a host of features accommodated in the leftover kit, slug adjustment kit etc. The Legend 1500 also comes with a host of optional kits that can enable the machine to fill capsules with pellets, tablets and soft gels customized to the requirements.

Features

- Industrial PC based controls
- Environmental sensors
- Anti-jamming device in capsule loading
- 21 CFR Part 11 compliant
- Quick changeover of capsule size and product
- Screw type auger to ensure formulation friendliness for any type of formulation
- Automatic centralized lubrication
