

Automatic Coffee Capsule Filling Sealing Machine

This Rotating disc filling sealing machine is suitable for the production of various kinds of products such as coffee powder. The machine made in Japan dragoness programmable logic controller, pneumatic control components, intelligent digital display temperature control system, sealed with high strength, good sealing, low failure rate, cover an area of an area small, etc, is the first choice for enterprise automation production products.

Function:

- Stable and reliable functions, security and alarming functions
- Stepless speed control, can adjust filling time.
- Filling volume precisely and seals cups perfectly and no wrinkled.
- Famous brand components from different country.
- PLC control, high precision filling, suit for kind of cups.
- Alarm with machine stop in case of insufficient inert gas supply.
- Easy to clean and maintenance

Technical parameters:

- Production capacity: 800 cups / hour (one cup each time)
- The cup capacity: 7-30g (adjustable)
- Tank capacity: 300 mm height 450 mm diameter size 30 l
- Heating power: 1 Kw
- Gas consumption: 0.6 m³ / min
- Power source: 380 v, 50 hz
- Die with: according to the cup size custom mold (can replace fast mold)
- Installation dimensions: 1250 mm * 1250 mm * 1750 mm
- Weight: 300 kg
