

Pouch Filling Machine

Many products manufactured in industries are sold in the market packed in beautiful pouches. The factories use the pouch filling machine to fill, seal and pack the pouches automatically at a faster speed. The low-maintenance machine is easy to use. It is available in automatic and semi-automatic versions. The output is quite high with each machine having a capacity to fill up to one thousand to three thousand pouches in an hour. Pouches of less weight up to two hundred grams and slightly higher weight up to two hundred grams can be easily filled with the machine. The machines that fill water in pouches are fully automatic. Industries that need to pack products in pouches can buy the pouch filling machine from Vista techno pack machines. The stainless steel machine is sturdy and it has a motor drive, heater and filling tank. The pouch length can be adjusted very easily. The wheels on the machine help in moving and shifting it.

Product Details:

Automation Grade	Semi-Automatic
Capacity (pouch per hour)	1000-2000
Pouch Capacity	400-600 grams, 100-1000 grams
Pouch Length	8
Machine Power	0-1 HP
Material	SS304
Brand	VISTA
Condition	New
