

## *Semi Automatic Beverage Hot Filling Machine MT32-32-10*

Semi automatic beverage hot filling machine for functional beverage is widely used in filling Beverage, Including fruit juice, tea drinks, functional beverages, etc.

### **Product description:**

Semi automatic beverage hot filling machine, It is called “3 functions in 1 machine”, It is widely used in beverage industry for the special production conditions, It can be equipped with disinfectant rinsing system, It is called “4 functions in 1 machine”.

It is specially designed for beverage products, Including tea drinks and mixed fruit drinks foaming and it's based on holiday filling technology.

### **The advantage of this machine as below:**

- Accurate for full filling. Bottle protection technology. minimize the amount of dissolved oxygen to avoid collapse Avoid collapse bottle model it will not It doesn't damage the bottle.
- Reasonable and, standard design. Constant current, constant voltage, non-foaming with high feed tank silos and feed system.
- Reasonable structure silo system (with exhaust, sealed, can be temperature), the middle-high speed line to cancel large cylinder, replacing with liquid distributor, can achieve thorough CIP pressure cleaning.
- Able to meet full filling and health requirements with Sanitary and high speed filling head system, umbrella-flow structure, filling faster than normal ones
- Temperature is under control with hot feelings temperature control system.

Automatic material sending system with reflux tank  
Reliable CIP cleaning system.

**Specifications:**

<b>Model</b>	<b>MT32-32-10</b>
Production B/H(600ml)	4000-8000
Bottle standard	Neck: $\varnothing$ 50-100mm Height:150-320mm
Water pressure of washing bottle	0.18-0.25Mpa
Water consumption for washing bottle (kg/h)	3000
Spraying position	10
Dripping bottle position	8
Filing precision	+5MM
Gas source pressure	0.4Mpa
Gas consumption(m <sup>3</sup> /min)	0.5
Total power(KW)	5
Total weight (T)	3
Dimension (L*W*H)mm	2700*2100*2100
