

## Rotary Automatic Stand Up Pouch Filling And Sealing Machine CK-HS8-200-S

The stand up pouch filling machine replaces the manual packaging, and realizes packaging automation for large, small and medium-sized enterprises. The operator only needs to place the premade pouch in the bagging area of the automatic pouch filling and sealing machine, the mechanical claw will automatically take the bag, print the date, open the bag, measure the signal of the measuring device and feeding, sealing and output.

Customers can also add functions such as emergency stop and abnormal discharge in the automatic pouch filling machine. according to product packaging requirements. The packaging process does not require manual participation, which improves production efficiency, saves labor and management costs, and reduces costs.

The stand up pouch filling machine has a wide range of application, and can be used for preamde pouch made of paper-plastic composite, aluminum-plastic composite, PE composite and other packaging materials, sealing quality is good, thus improving the product grade. Also can be a multi-purpose automatic pouch filling and sealing machine, only need to match different measuring devices according to different materials can achieve the automatic packaging of particles, powder, liquid and other products.

## Stand Up Pouch Filling Machine Features:

- Frequency control, the speed can be adjusted freely within the specified range.
- Automatic detection function, if the bag is not opened or the bag is incomplete, no feeding, no heat sealing, the bag can be reused, no material is wasted, and the production cost is saved.
- Horizontal bag feeding mode, the bag storage device can store more bags, and the quality of the prefabricated bag is lower.
- Adjust the bag width by motor control, press the control button to adjust the width of each group at the same time, easy to operate, save time.
- In line with the hygiene standards of the food processing industry, parts of the standup pouch filling machine that come into contact with materials or bags are processed with stainless steel or other materials that meet food hygiene requirements to ensure food hygiene and safety.

<b>Model</b>	<b>CK-HS8-200-S</b>
Packing Speed(bags/min)	20-40
Bag Size(mm)	W:120-210mm L:150-400mm
Bag Types	All kinds of compound bags, such as flat bag, 3-side sealing bag, 4-side sealing bag, zipper bag, stand up bag, etc
Filling Range	10-2500g
Total Power	4.75KW
Overall Dimensions(mm)	1800*1700*1500mm
