

JAS-100-B Screw Lifting Weighing Packing Machine

- *The tray is equipped with a weight sensor, according to the weight of setting fasting and slowing filling, ensure high precision.
- *The servo motor lift with tray, lift speed can be adjustment basically, when filling without dust.
- *Servo motor control screw, stable, high precision.
- *Specially designed in dust moving and recycle system.
- *Supporting sealing machine, sewing machine and conveyor to compose of the packaging line.
- *According to the customer requirement to increase ammonia system, improve the life of product.

Features:

This machine is designed and developed for the purpose of fine dust and high precision packaging. It is suitable for the packaging of carbon powder, fire extinguisher and other super fine powder.

Technical parameters

Model	JAS-100-B
Metering mode	Auger filling and weighing feedback
Weighing range	200g~25kg By changing auger screw
Filling velocity	200g~1000kg , $\leq \pm 2g$; $\geq \pm 1000kg$, $\leq \pm 0.2\%$
Filling speed	5~25times/min
Power Supply	Three phase 380V 50~60Hz
Total Power	3KW
The whole weight	450KG
Whole vlume	L1150×W1000×H2550mm
Hopper size	110L
