

Nuts Jar Filling Machine

This machine is a special design for the filling of snacks dry nuts into the jars. It adopt a 10 chambers automatic electric scale which is able to dosing the nuts at extremely precise level, and the PLC and HMI control system makes it easy, direct and automatic in operating. It is your best dry nuts filling solution.

Features:

- PLC & HMI control system have applied on this machine, you may easily adjust your producing parameters on the touching screen.
- Designed at IP65 hygienic level, all parts are made of SUS 304 stainless steel, and easy for cleaning and maintenance.
- Automatic processing monitoring, you may monitor the processing status, producing speed and production counting.

Technical Parameters:

Filling precision	≤99%
Processing speed	35~45 jars per second at 400ml jars
Scale chamber No	10
Scale chamber volume	1500ml
Scale chamber type	Double row no memory bucket
Mechanism	Servo
Power	1.5Kw 220V 50/60HZ(can be customized)
Weight	300kg
Dimension	1600mmL 1210mmW 2800mmH (with bracket)
