

BM-100 Automatic Cap Label Inserting Machine

This Automatic Cap Label Inserting Machine is suitable to shrink pvc or other shrinkable film then automatically cover the cap. The main material of the machine is stainless steel, precise labeling accuracy, also high standard film cutting accuracy, the blade position is adjustable, it is easy to maintenance in the future.

Features:

1. Full stainless steel (304) protective of main engine: Lead your worker can be safer to operate; the machine is fully waterproof stainless steel.
2. Cutter plate: Unique cut off, double blade for long using life
3. Label control sensor shelf: original creation tail surface and sensor are combined to improve the precision of cutting the material.
4. Touch screen: operate humanization

Technical Parameters:

Name	Parameters
Suitable bottle height	15-320mm
Bottle diameter	25-70mm
Bottle type	Round
Label height	30-70mm
Label thickness	0.03-0.08mm
Paper pipe interior span	3-10
Machine speed	300
Power	1.2KW
Dimensions	90*1600*1800
Weight	100KG
