

Semi - Auto Film Shrink Packaging Machine

Wrapper Around Packer is mainly used for beverage, beer, food and medical industry for glass bottles, PET bottles and zip-top cans packaging.

This machine is suitable for wrapping mineral water, bottles, beer, soft drink or boxes with tray or without tray. It is designed to work together with BSE Series PE-film or BS Series shrink tunnel. It uses the PE, POF, PP, PVC etc as packing material, mainly PE film. The wrapped object is pushed into shrink tunnel automatically one by one. High-quality pneumatic elements make machine work stably for long time.

Specifications:

Dimensions of shrink packing(mm)	L1500*W840*H1900
Heater tunnel Size	L2500*W850*1480mm
Max Packing Dimension	L400*W270*H330mm
Packing Speed	2-5 packs/minute
Height Of Conveying Belt	750mm
Weight packing machine	230KG
Weight of tunnel	230KG
Power of packing machine	1.8KW
Power of heating tunnel	20KW
