Chamber vacuum packaging machines produced by our company have won unanimous praise from customers since they were launched on the market. The company has an independent and perfect vacuum packaging mode, Double chamber vacuum packaging machine quality is good, the price is reasonable, is your first choice of vacuum packaging.

Description:

Double chamber vacuum packaging machine, that is, the machine has two different operating rooms, the product needs to go through two operating rooms before packaging.

Chamber vacuum packaging machine operation process is like this, when the product packaging in the first room, after the second room to unload and load multiple product packaging can be put together, or put a product into several. This pattern makes the packaging process especially effective.

Double chamber vacuum packaging machine is easy to operate and easy to clean. And the machine has two control modes, manual and pneumatic, which make the packaging process more convenient.

The machine is made of high quality stainless steel and easy to operate, clean and maintain. Simple operating system can greatly save the production time and production cost of enterprises and increase their profits.

Technical Data:

Model	LGDZ700/2SB
Voltage	380V/50Hz
Power(kw)	3.5
Packing capacity (time/h)	120-180
Sealing size (mm)	700×10mm/2piece
Sealing center distance (mm)	640
Vacuum chamber size(mm)	750*750*125
Dimension (mm)	1500*850*925
Material	Thickness4mm/304stainless steel
