

Automatic Rotary Round Bottle Capping Machine

Capping Machine specially designs a Rotary Capping Machine according to different materials and bottle specifications. It is equipped with different feeding mechanisms, such as Granule Z Type Elevator and pump filling. It can realize the filling and packaging of granule, liquid and powder. Rotary capping machine is widely used in pesticide, grease, food, beverage, chemical, grease, pharmaceutical and other industries. The price is favorable, the space is saved and the operation is convenient. It is suitable for different size bottle caps and bottles. The screwing power and speed of Automatic Bottle Capper are adjustable.

Technical Parameter:

Name	Rotary capping machine	Voltage	220V 50HZ
USing Gas Source	0.4-0.6Mpa	Capping Range	Diameter ≤50mm
Machine size	2300*1400*1600	Lock Bottle Range	H:50-320mm W:20-100m
Net Weight	200KG	Capping Rate	25-30Pcs/Min
