

Automatic Doypack Machine YD-230A

This automatic doypack machine system consist of 8 stations rotary packing machine, 14 heads combination weigher, Z shape bucket elevator and platform. With SIEMENS PLC and HMI, FUJI frequency converter, the machine can works at a maximum packing speed 60 bags per minute.

Application:

Suitable for solid & granular products packing, such as nuts, snacks, chips, melon seeds, pet food, etc.

Features:

1. Easy to operate: PLC and HMI control, all parameters can be set on touch screen easily.
2. Variable frequency speed regulation: adopt FUJI frequency convertor, speed can be adjust within the certain range.
3. Adopt ORION oil-less vacuum pump, avoid polluting the environment in the production.

Technical Parameters:

Model	YD-230A
Working Position Number	8 stations
Pouch Style	Doypack pouches with/without zipper
Pouch Size	W: 80-230mm; L: 100-350mm
	Other sizes available
Packing Speed	20-60 bags/min
Power Requirement	380V, 3 phases, 50/60Hz or customized
Power	5kw
Air consumption	≥0.6 m ³ /min (supply by user)
