

DG-118 oral liquid plastic bottle filling and sealing machine

DG-118 Oral Liquid Plastic Bottle Filling and Sealing Machine is group molding machine for plastic containers from material of PVC and PE, and filling them with the subsequent sealing. It's unique model without analogue in the world market.

Features:

1. Controlled by PLC, the frequency conversion infinitely variable speeds.
2. All 6 processes from spreading roll, AMP bottle forming, filling, sealing the end, printing serial numbers, cutting the end, cutting apart, controlled by programming.
3. The computer human interface has simple and clear operation.
4. The filling head does not drop, leak, rise in bubbled and spill over.
5. All are made of high-quality stainless steel, accord with the standard GMP.
6. Mostly pneumatic components and wirings adopt inward fittings.
7. Automatic and mechanical bottling, precise calculation and limited deflection.

Technical Parameters:

Model	DG-118
Max. Forming Depth	12 mm
Cutting Frequency	0-15 times
Packing Material Size	PVC/PE (0.2-0.4) × 120 mm
Plastic Bottle Volume	2-25 ml/bottle
Power	380V/50Hz/3.5KW
Packing Size	1320×1720×770 mm
Packing Weight	550 Kg
