

## ***Intelligent Automatic Food Packing Machine HTL-SF480A/480B***

Automatic packing machine with film beneath-supply system is to wrap the products with irregular shapes and in bulk such as instant noodle, wet tissue paper, noodle, egg roll, soft candy, fruit, towel, and dry fruit.

### **Characteristics**

1. Full servo motor control, the bag length is set and cut, only the number of cutters for sealing is input, and the system can realize split knife operation.
2. Using 7-inch color LCD touch screen integrated control, simple and intuitive operation.
3. Regardless of whether the material supply is continuous or intermittent, under any circumstances, the system can automatically and accurately ensure uniform materials in each packing film, achieve material stoppage and stop film feeding, achieve zero empty package, and zero loss of packaging materials.
4. The material deviation or shift, the cutter stops, after the materials is discharged, the cutter automatically resumes operation.
5. The equipment will automatically connect the membrane without stopping the machine, which will save costs.
6. Intelligent modular temperature control more accurate temperature control.
7. High precision tracking.
8. The transmission is simple, the work is reliable, and the maintenance and operation of the equipment that has not been touched can be mastered in 5 minutes.
9. The whole machine is equipped with multiple security protection measures.

**Specifications:**

Making-bag length	50-360mm
Making-bag width	30-120mm
Making-bag height	3-50mm
Packing speed	50-200bag/min
Total power	3KW
Motor power	0.7/0.37KW
Heating power	1.8KW
Voltage	380/220V
Dimension(LxWxH)	4000x950x1150
Weight	660Kg
