

BG60A-2 Film Filling and Sealing Machine

BG60A-2 film filling and sealing machine is suitable for the production of all kinds of yogurt, jelly drinks and other products. It can automatically drop cups, automatic filling, automatic filling film, UV disinfection, two heat Seal and other functions. The whole machine adopts Japan OMRON programmable logic controller, CIP automatic cleaning cartridge, pneumatic control components in Taiwan, intelligent digital temperature control system, with high sealing strength, good sealing, low failure rate and so on.

Technical Parameters:

Model	BG60A-2 film filling and sealing machine
Output	2000 cups / hour
Filling capacity	50ml-200ml
Air consumption	0.6 m ³ / min
Power	2 Kw
Voltage	~ 220V / 50Hz
Overall dimensions	2400mmX800mmX1650mm
Weight	About 500kg
