

Horizontal Flow Wrapper MK-250

Horizontal Flow Wrapper, MK-250B type

Horizontal Flow Wrapper, MK-250X type

Mingke Pack offers two types of horizontal flow wrappers: the MK-250B and MK-250X, both of which are semi-automatic, continuous packaging machines. The difference lies in the position of the film reel, as it lays separately in the top and bottom of the transverse sealing jaw. This also decides applicable packaging materials.

The MK-250B horizontal flow wrapper's packaging film reel is mounted on the top of the transverse sealing jaw to manage regular products like bread, chocolate and more.

The MK-250X horizontal flow wrapper features a bottom film feeding mode, making it applicable for packaging loose materials, including disposable tableware, cotton swabs, hardware fittings and more.

Bag materials:

OPP/CPP composite film, OPP/CE composite film, MST/PE composite film, PET/PE composite film, aluminum foil.

Additional Options:

- Ink Printer.

Technical Parameters:

Model	MK-250B/X
Packing speed	40-230bag/min
Bag size	L: 65-190mm or 120-280mm, W:30-110mm
Max film width	250mm
Product Height	Max.40mm
Film Roll Diameter	Max.320mm
Power source	220V,50/60HZ,2.4Kw
Weight	450kg
Overall size	(L)3770×(W)670×(H)450mm
