

Liquid filling packing machine KF01-L

This filling machine is one kind of piston filling machines. It is driven by pneumatic and electric. Electrical and compressed air is needed to run machine. This series of filling machines are designed specially for filling good fluidity products such as water, shampoo, oil, milk, juice etc. There are several models of this kind filling machine basing on different volume. Different model has different filling range. Please select the best model below according to the volume of your bottles, jar or other containers.

Features

- Filling range is wide and adjustable.
- Long working life with high quality o rings.
- High accuracy by using quality components such as cylinder.
- This filling machine can run automatically or operated by a pedal
- All machine body is made of SUS 304. It is easier to clean and more hygeian.

Technical Parameters:

Model	KF01-L100	KF01-L200	KF01-L 500
Weight	30kg	35kg	50kg
Filling speed	40-60	40-60	30-50
	bottles/min	bottles/min	bottles/min
Filling volume	5-100ml	10-200ml	50-500ml
Filling accuracy	≤±1%	≤±1%	≤±1%
Size	80*10*90cm	88*10*100cm	88*10*100cm

Model	KF01-L1000	KF01-L2500	KF01-L 5000
Weight	60kg	65kg	80kg
Filling speed	30-50	25-50	25-50
	bottles/min	bttles/min	bttles/min
Filling volume	100-1000ml	500-2500ml	1000-5000ml
Filling accuracy	≤±1%	≤±1%	≤±1%
Size	100*20*110cm	100*20*110cm	110*20*120cm
