

## *GTA 450 Series Disposable Syringe, Infusion Set Special Machine*

### **Equipment Characteristics**

- No evident direct cost increase and the indirect cost are reduced significantly.
- Greatly reduce the cost comparing with dialysis paper packaging.
- Reducing the epoxy ethane volume and shorten the sterilization period.
- Lessening bag bulging and carton swelling phenomenon, improve production efficiency and lower goods rejection.
- The whole packaging effect and class give new and fresh feelings.
- Reducing labors, lightening management difficulty and pressure.
- According to the current packaging status of domestic disposable syringe and disposable surgery apparatus, our company has succeeded in developing packer that is distinguished from traditional packer, created a new type of syringe product packaging form by adding the dialysis paper-attaching device to the intrinsic matured packaging machinery.
- For disposable infusion set, we have developed dialysis paper attaching prefabricate bag packer.

- According to customer requirements, our company can customize the automatically collation system connected with packaging machine, achieve waste removing function controlled by servo driving system.

### Main Technical Parameters

Name	Disposable sterile syringe packer		Bag producing machine
Model	GTA450-99	GTA450-120	GTA450-150
Product height	450mm	450mm	450mm
Packing speed (packs/min)	5mm-35mm	5-45mm	/
Product Spec.	30-100	30-80	30-160
Product Spec.	0.5-20ml	20-50ml	/
