

## *WB-280F-4 Multi Lane Back Sealing Bag Powder Packing Machine*

Multi-Lane Back Sealing Bag Powder Packing Machine is designed for packaging back-seal bags, suitable for various markets such as food and medicine, including flour, coffee powder, medicinal powder, etc. It is a good choice for enhancing product competitiveness.

### **Feature**

- The machine has high precision and good stability;
- It has complete safety measures to protect the safety of equipment and personnel;
- Particularly compact footprint.
- Module which can be independent or integrated into the produce collating section of the box machine and case packer;
- Automatically complete the functions of metering, bag making, filling, nitrogen filling, etc. The main part in contact with the filling content is made of stainless steel, which meets safety and health standards;
- Automatic control and easier installation of packing film;
- The equipped bag maker has a small accuracy error, which can avoid problems such as film deviation, bag-making deformation, and wrinkling

### **Application**

Suit to powder product: flour, milk powder, coffee powder, glucose, medical powder, nutrition powder, chemical powder etc.

## Technical Parameters

<b>Model</b>	<b>WB-280F</b>
<b>Lane number</b>	4 Lanes
<b>Filling method</b>	Screw Auger
<b>Capacity</b>	Max.40 cycle/min
<b>Film Width</b>	Max.560mm,0.07-0.10mm
<b>Bag size</b>	L:50-180mm;W:20-90mm
<b>Sealing type</b>	Back sealing / Stick bag
<b>Cutting type</b>	1.Straight cutting; 2. Zig zag cutting; 3. Round cutting; 4. Die-cut
<b>Power</b>	5.5kw
<b>Air supply</b>	0.8Mpa 0.8m <sup>3</sup> /min;
<b>Overall Dimension</b>	1685*1300*2005mm;
<b>Net Weight</b>	550kg
